Chiropractic

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both to be working towards the same objective as this prevents any confusion or disappointment.

The objective of chiropractic health care in our office is to improve and optimize the health and function of the spine and nervous system through the correction of vertebral subluxations<sup>2</sup>. A chiropractic adjustment<sup>1</sup> is the method used for the correction of the vertebral subluxations.

We do not diagnose or treat any disease. We analyze the spine for vertebral subluxations. If, during the course of a chiropractic spinal evaluation, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area.

Our commitment to your health is to (1) evaluate and monitor your spine and nervous system on each visit to determine if the adjustment and adjusting procedures that will get the best outcome for you and (2) to provide you with supportive education and information so you can get the best results from our care.

I, \_\_\_\_\_ have read and fully understand the above statements. All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction.

I therefore accept chiropractic care on this basis.
